Region specific data required

Novatron is refactoring the software package installers to simplify the software distribution process and improve the quality of the software version control. A part of the new installer is the so called localization-installer, which will include all the region specific files (coordinate system, geoid and Novatron system configuration files). The localization-installer will also set the global language settings for Novatron applications and the system time.

For the localization installer to work as planned, we're asking for the distributors in Sweden (Novatron Sweden), Norway (Hella Maskin) and Germany (MOBA) to send us the following information (**by June 15th of the year 2015**):

- The coordinate system files used in your market area(s)
- The geoid files used in your market area(s)
- The default Novatron system settings used in new installations (system backup .zip file) and the default DBSN used in your market area(s):
  - Install both systems separately (Xsite App and Landnova&Vision)
  - Configure the systems as you would during a real system installation:
    - Set the DBSN (regional default DBSN)
    - Configure system GNSS-settings (including RTK correction settings)
    - Configure language-settings
    - Configure the user interface
  - Do a system backup and send the created backup .zip file (separate backups for Landnova&Vision and Xsite App!)

<u>Note that if you distribute products to several different regions (mainly MOBA) you need to provide the required files for each area separately!</u>

When you've collected all the required files, please compress everything to a single .zip file, and name the file according to the market area and date of creation. Below you can see an example of the file structure:

- FINLAND_12052015.zip
  - CoordinateSystems(folder)
  - GeoidFiles(folder)
  - XsiteAppSettings_TYPE-DEFAULT-DBSN-HERE(folder)
  - LandnovaSettings_TYPE-DEFAULT-DBSN-HERE(folder)

The goal of the new installer is to minimize the repetitive software configuration done during system installations.

Please send the required information to:
